L2 SIGNALS SERVICES — LEGAL | Version 2026.11.2 | Effective 2 November 2026

Founding Members Programme

The Founding Members Programme is the invitation-based membership through which L2 Signals is currently offered to a limited group of traders who want access to the platform's systematic intraday setups while the business continues to develop its technology, validate its strategies and improve delivery infrastructure. Access is by invitation only.

PROGRAMME STATUS	ACCESS ROUTE	SERVICE
Invitation only	**Invitation, then acceptance of these documents**	**Premium access to L2 Signals**

1. Programme overview

L2 Signals is being developed to provide a structured, rules-based approach to intraday trading through a deterministic signal engine that identifies opportunities using predefined market conditions and technical filters. The founding programme introduces a limited group of members to the service while the platform continues to develop. Founding members receive access to the designated signal group and the benefits expressly described in this document and the applicable policies.

2. Membership capacity

Founding membership is limited and closes when L2 Signals decides. A place is confirmed only after the applicable payment is verified. Expressing interest, or being invited, does not itself constitute a paid subscription or guarantee a place. L2 Signals may close the programme when it reaches the capacity it has set, and is not obliged to publish that number.

3. Fee and payment

The fee for an access period, and the period itself, are shown on the payment page and only after the reader has accepted the Subscription Terms, the Trading Risk Disclosure and this programme's conditions. The amount is set server-side for the chosen method and is not published in advance of that acceptance.

Accepted methods may include Nigerian naira, US dollars and supported cryptocurrencies. Where crypto is accepted, the amount, supported network, address and requirements are communicated on the payment page — members must ensure payments use the correct asset, network and details.

4. Membership access

A confirmed founding member receives access to the designated L2 Signals signal group for the duration of their active subscription. The service may include the instrument and direction, proposed entry price or zone, stop-loss, take-profit level(s), signal status and updates, and other trading information made available. The exact signal format and delivery process are described before payment and in the private group.

Membership provides access to the signal service. It does not automatically include unrestricted access to the underlying application, source code, internal strategy parameters, administrative tools or signal-generation infrastructure. Additional features are included only where expressly stated in the applicable membership offer.

5. Founding member performance-based extension

L2 Signals will provide eligible founding members with a one-time additional month of access if the eligible signals recorded during the calendar month in which their first paid subscription period begins produce a cumulative net result below zero R, measured in R-multiples. Conditions:

1. The member must hold an eligible first paid subscription.
2. The calendar month in which that first paid period begins must have concluded.
3. The eligible signals must have been evaluated under the Performance Measurement Policy.
4. The cumulative net result for that period must be below zero R.
5. The member receives one additional month of access without an additional subscription charge.

A result of zero R or above does not qualify. The extension is available only once per founding member, applies exclusively in relation to the calendar month in which the first paid subscription period begins, and is not provided for subsequent paid months.

6. Nature of the extension

The extension is an additional service-access benefit. It is not a cash refund, reimbursement of trading losses, compensation for losses in a personal account, or a guarantee that future signals will be profitable, and it does not guarantee recovery of previous losses or a positive result during the additional month. Members remain responsible for their own decisions, execution, sizing and risk management. Eligibility is based on official L2 Signals records, not individual account profit or loss.

7. Subscription continuation and cancellation

After the initial paid period, members may continue under the applicable renewal terms. Members who qualify retain access for the extension period without an additional charge; after it ends they may renew or discontinue. Members who do not qualify may cancel under the applicable cancellation terms. Cancellation does not automatically entitle a member to a refund for a completed period; refund requests are handled under the Refunds & Cancellations policy, and nothing excludes a right you have under applicable law.

8. Trading risk and performance limitations

Trading involves risk, including the possibility of losing some or all of the capital allocated to trading. Historical results, backtests, forward tests and previously profitable signals do not guarantee future performance. Actual results may differ from published outcomes because of spreads, slippage, execution

delays, broker conditions, volatility and individual practices. L2 Signals does not promise a specific win rate, profit factor, monthly return or profit amount, and the performance-based extension must not be interpreted as a guarantee of profitability.

9. Application access and service security

Founding membership grants access to the designated signal service, not unrestricted access to the underlying application or internal infrastructure. Members must not bypass access controls, interfere with the signal-generation system, access administrative functions without authorisation, exploit vulnerabilities, redistribute restricted content, or share private credentials without authorisation.

10. Programme updates

L2 Signals may refine service delivery, technical infrastructure and procedures as development progresses. Material changes affecting the agreed price, membership benefits or extension eligibility are communicated in accordance with the applicable terms and consumer-protection requirements. No change retroactively removes an extension benefit a member has already qualified for.

11. Acceptance of terms

Participation is subject to the Subscription Terms and Conditions, Performance Measurement Policy, Founding Member Extension Policy, Trading Risk Disclosure, and other applicable service policies. Members are expected to review and accept the applicable terms before their subscriptions are activated.
