L2 SIGNALS SERVICES — LEGAL Version 2026.11.2 Effective 2 November 2026

Subscription Terms & Conditions

These terms govern access to L2 Signals, a systematic intraday signal service providing structured setups based on predefined strategy rules and market conditions. By subscribing, paying, or accessing the members-only service you acknowledge that you have read and agreed to them. If you do not agree, do not subscribe. Contact: l2signalslab@gmail.com.

1. Introduction

These Subscription Terms & Conditions govern access to L2 Signals. Subscribing, making a subscription payment, or accessing the members-only service confirms acceptance of these terms.

2. Description of the service

L2 Signals provides signals generated by its systematic signal engine. Depending on the signal, information may include the instrument, trade direction, entry price or conditions, stop-loss (SL), take-profit (TP), signal status and updates, cancellation notices and other trade-management instructions.

Signals are generated only when the engine identifies conditions that satisfy its predefined strategy rules and filters. L2 Signals does not guarantee that a signal will be generated every day or in any particular period, and will not generate signals merely to maintain activity or satisfy a preferred trading frequency. Features may change as the platform develops.

3. Access period and fee

L2 Signals is offered by invitation. The access period and the fee for that period are shown on the payment page, and only after the reader has accepted these terms, the Trading Risk Disclosure and the associated subscription documents. The amount is set server-side for the payment method selected; it is never taken from the browser.

One payment covers one access period. Nothing renews automatically: a further period requires a further payment. Fees are fixed at the amount displayed when a payment is made, and a change applies to future periods rather than retroactively to a completed payment. Where a price change is intended, it is communicated before it takes effect.

The fee purchases access for the stated period. It does not purchase the software, the strategy, the brand or any ownership interest, and it does not guarantee profits.

4. Accepted payment methods

L2 Signals may accept payments in Nigerian naira (NGN), United States dollars (USD), and supported cryptocurrencies. Specific methods, supported networks, wallet addresses and instructions are communicated through official channels.

Subscribers are responsible for verifying instructions before sending funds and, for crypto, must use the exact asset and network specified. L2 Signals is not responsible for losses resulting from payments sent to incorrect addresses, unsupported networks, incorrect assets or unauthorised third-party addresses. Transaction and network fees are the subscriber's responsibility. A payment is complete only when L2 Signals has verified receipt of the required amount; sending a payment without successful verification does not automatically activate access.

5. Subscription activation and access

Access begins once payment is received, verified, and the subscription is activated. Subscribers receive access to the designated members-only channel or other delivery method. Access is personal and may not be transferred, resold, or shared. L2 Signals may restrict or revoke access where there is evidence of unauthorised sharing, abuse, fraud, or material breach.

6. Calendar-month performance measurement

Official performance is measured using calendar months. Each period begins at 00:00 on the first day and ends at 23:59:59 on the final day of the month, using West Africa Time (WAT, UTC+1). Monthly net R resets to zero at the start of each calendar month.

This calendar is independent of individual subscription dates and payment timing. A subscriber who joins mid-month falls under that month's official record; renewing early, or paying late, does not shift or create a separate measurement period. The official result is determined by the signal engine's recorded outcomes under its documented rules — never by an individual's balance, profit, loss or personal net R. The full methodology is in the Performance Measurement Policy.

7. Signal performance and individual trading responsibility

Each subscriber is responsible for their own trading decisions and account management, and for following published instructions, including entry conditions, stop-loss, take-profit and official updates. A subscriber may obtain a different result from the official outcome because of entering at a different price or time, widening or removing the stop-loss, moving the take-profit, closing early, ignoring an update or cancellation, broker pricing, spreads, slippage, delays, fees, position sizing or leverage.

These differences do not change the official outcome. Official performance is measured from the signal engine, not the founder's or any subscriber's trading account. This provision does not excuse errors in L2 Signals' official records or misrepresentations of reported performance.

8. No guarantee of profitability

L2 Signals does not guarantee that subscribers will make profits, avoid losses, achieve a particular win rate, or receive a minimum number of signals. Trading involves risk, including the possibility of losing some or all of the capital allocated to trading. Historical, backtested, forward-tested or previously reported performance does not guarantee future results. The subscription fee purchases access to the service — not guaranteed profits.

9. Founding Members Programme

The Founding Members Programme is a closed, invitation-based subscription programme. It is limited and closes when L2 Signals decides, is subject to availability and confirmation, and creates no entitlement to a place. Unless stated otherwise in writing, founding members remain subject to the applicable fee and these terms. Founding-member status does not guarantee preferential trading outcomes, a minimum number of signals, or permanent access regardless of subscription status.

10. One-time founding-member extension

Eligible founding members may qualify for one additional month of access under the extension policy. It applies only in relation to the calendar month in which the first paid subscription period begins, once per eligible member, and is determined by the official calendar-month net R (see the table below). It is based exclusively on the signal engine's official performance — not the subscriber's personal account, net R, balance, or profit/loss. The extension is additional access; it is not a cash refund or reimbursement of losses.

Official monthly net R	Extension
Below 0R	Eligible
Exactly 0R	Not eligible
Above 0R	Not eligible

11. Renewal and late payment

Subscriptions are prepaid for a fixed access period (currently 30 days). Subscribers who wish to continue must renew according to the communicated instructions. Where a subscription expires without successful renewal, access may be suspended until payment is received and verified. Late payment does not alter the official calendar-month performance cycle or create a new period, and payment alone does not guarantee uninterrupted access until it is verified.

12. Cancellation

Subscribers may choose not to renew. Because the subscription does not renew automatically, no cancellation action is required to stop a future charge. A subscriber may also ask to be removed from the private group or ask for confirmation that access will not be extended. Unless a separate written agreement provides otherwise, cancellation stops future access but does not automatically entitle the subscriber to a refund for a period already paid; refund requests are handled under the Refunds & Cancellations policy. A qualifying extension is governed by the extension policy. Cancellation does not alter the official performance records for a calendar month.

13. Refunds and service extensions

Requests for a refund are reviewed individually under the Refunds & Cancellations policy. A duplicate or erroneous payment is corrected once verified, and nothing in these terms excludes a consumer right that cannot lawfully be excluded. The founding-member extension is a separate programme benefit and is not a monetary refund; it does not reimburse personal trading losses, broker fees, spreads or commissions.

14. Service availability and maintenance

L2 Signals may perform maintenance, updates, strategy adjustments or technical work. Temporary interruptions may occur due to technical failures, connectivity issues, market-data availability, third-party services or other operational circumstances. Material interruptions are communicated where reasonably practical, but uninterrupted or error-free operation is not guaranteed. Technical interruptions do not automatically entitle subscribers to refunds or extensions unless required by law or provided under a written agreement.

15. Acceptable use

- Do not share members-only signals or access credentials with unauthorised individuals.
- Do not resell, redistribute or commercially exploit content without written permission.
- Do not attempt to access restricted systems or internal engine components without authorisation.
- Do not interfere with the service, abuse infrastructure, or circumvent access restrictions.
- Do not misrepresent yourself as a representative of L2 Signals or misrepresent official performance.
- Do not use the service for unlawful activities.

L2 Signals may investigate suspected misuse and restrict or terminate access where a material breach is established, generally after an opportunity to remedy unless immediate action is reasonably necessary.

16. Intellectual property

The L2 Signals name, branding, platform, signal engine, software, proprietary strategy logic, documentation and other original materials are owned by L2 Signals or used under authorisation. Subscription access does not transfer ownership. Subscribers may use signals for their own trading decisions but may not copy, reverse-engineer, redistribute or commercially exploit proprietary components without written permission.

17. Privacy and member information

L2 Signals may collect and process information necessary to administer subscriptions, verify payments, provide access, communicate with members, maintain records and address support requests. Members should not submit unnecessary sensitive personal or financial information through public channels. See the Privacy Policy for details.

18. Changes to the service or terms

L2 Signals may update service features, technical systems, documentation and procedures. Material changes are communicated through official channels and, unless required by law or agreed otherwise, apply prospectively without retroactively altering completed performance calculations or previously determined extension eligibility.

19. Limitation of responsibility

To the extent permitted by law, L2 Signals is not responsible for losses arising from subscribers' individual trading decisions, execution deviations, broker conditions, market movements, leverage, or other factors outside its reasonable control, and does not guarantee that signals suit every subscriber. Nothing here excludes liability where doing so would be unlawful.

20. Governing law and disputes

Governing law and dispute-resolution arrangements will be specified in the final published terms, taking account of the operating jurisdiction and applicable legal requirements. Raise questions or disputes through the designated official channel; L2 Signals reviews them using subscription records, published instructions and applicable policies.

21. Related policies

Read these terms alongside the Founding Members Programme, Performance Measurement Policy, Founding Member Extension Policy, Signal Access & Delivery Policy, Trading Risk Disclosure, and Privacy & Acceptable Use Policy.

22. Acceptance of terms

By subscribing, paying, or accessing the members-only service you acknowledge that: subscription access does not guarantee profits; official performance is measured using the signal engine's recorded outcomes; monthly net R resets each calendar month independently of payment dates; personal account results do not determine official performance or extension eligibility; you are responsible for your own decisions and execution; changes you make to entries, stops, targets or instructions may produce different results; the extension is conditional, applies once, and is determined by the official monthly net R; signal generation depends on market conditions and the engine's rules; and you should read the relevant policies before subscribing.
